Part No.: **D747A-11**  
 Model No.: **C.1F30G1.1F30N1.A06VDC**  
 Description: **BTC-IIS Diaphragm Pump, Brushless Motor**

**Dimensional Layout:**

**Specifications:**

- |                               |                              |                     |                       |                                  |                                       |                |
|-------------------------------|------------------------------|---------------------|-----------------------|----------------------------------|---------------------------------------|----------------|
| <b>1. Wetted Materials:</b>   | Pump Head:                   | Vectra [LCP]        | <b>3. Electrical:</b> | Motor:                           | Brushless, Dual Bearing               |                |
|                               | Retainer Washer:             | 2024 Alum [800/800] |                       | Operating Voltage:               | 6.0 VDC                               |                |
|                               | Retainer Screw:              | 316 Stainless       |                       | In-rush Current:                 | 5 x Operating Current for up to 50 ms |                |
|                               | Valves:                      | EPDM [Q55/Q55]      |                       | Recommended Fusing:              | Slow Blow @ 2 x Operating Current     |                |
|                               | Diaphragm:                   | AEPDM [F80/F80]     |                       |                                  |                                       |                |
| Gasket:                       | EPDM [65/65]                 |                     |                       |                                  |                                       |                |
| <b>2. Performance:</b>        |                              | <u>Continuous</u>   | <u>Maximum</u>        | <b>4. Other:</b>                 | Temperature Range:                    | 5 - 50° C      |
|                               | <b>- Vacuum: in Hg [AIR]</b> | Head 1:             | 16.0                  |                                  | 17.0                                  | Free Flow RPM: |
|                               | Head 2:                      | 16.0                | 17.0                  | Eccentric:                       | A430                                  |                |
| <b>- Pressure: PSIG [AIR]</b> | Head 1:                      | 16.0                | 19.0                  | <b>5. Operating Limitations:</b> | Not configured for series operation   |                |
|                               | Head 2:                      | 16.0                | 19.0                  |                                  |                                       |                |

The above graph denotes nominal performance under the following conditions: 800' above sea level, 24°C, and at the specified voltage.
