Mini Pumps (air/gas)

BTC Miniature Diaphragm Pumps and Compressors are a series of brush and brushless DC motor driven pumps designed to handle air and gases. The innovative, compact design incorporates leading edge technologies that allow it to operate harder, hotter, quieter and longer than existing pump designs. The BTC Series offers multiple component configurations allowing them to be used for either vacuum operation, pressure operation, or alternating vacuum and pressure operations.

Features

- **Highest Performance/Size Ratio:**
Innovative and efficient engineering designs enable the BTC Series to push the performance envelope in a lightweight, compact size.
- **Runs in Hotter Environments:**
Selection of advanced materials and our proprietary elastomer diaphragms and valves allow our pumps to operate in increased temperature environments up to 158°F (70°C).
- **Performs Quieter:**
Optimized head, chamber, and flow path reduce noise without compromising performance.
- **Lasts Reliably Longer:**
Using our proprietary advanced diaphragm elastomer and superior brushless motor design sets the highest benchmark for service-free operation that exceeds 10,000 hours.
- **Installs Easily:**
Incorporating the lightweight EZ Mount facilitates simple system assembly while dampening vibration and reducing noise levels.
